AL-AMTHAL DIFFERENCE

In AL-AMTHAL we seek to provide services to our clients that are truly differentiated from those offered by other providers operating in the region. There are core strategy to AL-AMTHAL's difference:

UNRIVALED EXPERTISE IN OUR MARKETS

To operate to the highest international standards in any region, you must be the expert in that region. As the leading independent petroleum services provider To international oil majors, national oil companies in the Middle East and North Africa region, we are the unrivaled Experts in our market because this is our home market.

We understand the geology.

We have pioneered technical and logistical solutions. We know how to work in tough environments.

And we are expanding our home markets throughout the Middle East and North Africa , where we implement our goal of highly trained local employees making-up the majority of our team in every country.

OUR INTERNATIONAL EXPERIENCE

with long years of experience at the leadership level; AL-AMTHAL has assembled a team of international experience with leading energy service companies worldwide. Every day, we are seeking to expand our ability to serve our clients by adding professionals with even broader and deeper expertise.

GETTING THE JOB DONE RIGHT, EFFICIENTLY, AND SAFELY THE FIRST TIME EVERY TIME

Our relentless focus on total quality encompasses four areas:

- Delivery in exceeding clients' expectations;
- Efficiency in getting the job done right the first time;
- Cost - effectiveness when providing the services to clients;
- and last but not least we always aim to be recognized by industry leaders by ensuring the maximum safety and health of our people and clients while leaving no negative footprint on places where we operate.

PROVEN PROCESSES TO ENSURE TOTAL QUALITY

AL-AMTHAL is a process-driven company, and we are implementing and improving proven processes to ensure total quality in service delivery, employee training, and in environmental, health, safety and security best practices.

Independent Oilfield Service Company in the Middle East & North Africa

COMPANY HISTORY

The company was founded in Iraq since 2019, with the vision to create a regional independent Oilfield Services company that can compete at parallel level with the international major Oilfield Services companies.

What started in 2019 with a handful of dedicated people and one supply contract has become one of the fast-growing independent Oilfield services companies in this region. The key factors in this remarkable evolution and growth are:

- + The continuous investment in top quality human talent is the cornerstone of our success.
- + A Customer centric organization that drives our today and directs our tomorrow.
- + Our core values of Integrity, agility and respect are the only way we operate.

AL-AMTHAL started with Oilfield Services business in 2019 with its first contract secured with Sonangol in Najma Field in Iraq in late of 2019 with the aim to establish the largest oilfield Supplies Company and oilfield Services contractor in the Middle East, however, the market demand and the request of our customers sparked the big picture which AL-AMTHAL is all about today. In 2021 the company added the Oilfield Tools Supply services. This illustrates AL-AMTHAL's commitment to service quality and ability to responsibly manage growth in difficult market conditions.

Today, AL-AMTHAL enjoys a strong position as an independent regional oilfield services Company offering a comprehensive and diversified technology profile and services comparable to those of longstanding global oilfield services companies.

At AL-AMTHAL:

- Our experts listen to customer needs and requirements.
- We address priorities and focus on ability to deliver.
- Simply said "we walk the talk".

EXPANSION & GROWTH

In its first Year, AL-AMTHAL expanded rapidly within Iraq to capture opportunities in the vast geography of Iraq itself. This led to major investment in infrastructure and facilities in Erbil, and Basra. In conjunction with this expansion we had increase in services provided to the market by growing our services structure that remains at the heart of our excellence in service delivery.

After the company consolidates strong positioning in all its Services in Iraq, the next phase is to replicate this success in the region thru a regional growth plan built on the organizations' maturity and the strength of the Product line teams to deliver in.

The objective of this expansion is to gain Profitable Growth opportunities, Diversification and creating a regional growth and competing with the giant Oilfield services companies that are controlling the market for decades. Our 5 year Regional Growth plan is in full swing and this ambitious plan will further strengthen AL-AMTHAL brand name in the region.

Independent Oilfield Service Company in the Middle East & North Africa

MISSION, VISION & CORE VALUES

OUR VISION

Our vision is to be the leading Integrated Drilling and Oilfield Services provider in the Middle East and North Africa region by 2030 and internationally in all areas where we operate.

OUR MISSION

Our mission is to consistently meeting or exceeding our clients' expectations in every job through our passionate and consistent commitment to get every job done right, efficiently, and safely the first time every time.

We consider every project we work on mission critical to our clients' success and ours. And we succeed at our mission by paying attention to details, planning our work in advance, applying proven quality processes, and proactively interacting with our clients and maintain, as the cornerstone of our business, the health and safety of our employees and the protection of the Environment.

OUR CORE VALUES

Passionate and consistent engagement

We spread our positive attitude, exceed expectations, and find ways to broaden our job horizon.

Every person is valuable, everyone's voice is heard, and great ideas are welcomed no matter where they come from.

Everyone at AL-AMTHAL firmly believes in our mission, and we think and act according to it while performing each and every task.

Independent Oilfield Service Company in the Middle East & North Africa

SUSTAINABILITY

Independent Oilfield Service Company in the Middle East
& North Africa

SUSTAINABILITY & SYSTEMS

AL-AMTHAL seeks to be a long-term partner to our clients, and to do so we know that we must get the job done right, efficiently, and safely the first time every time. Our relentless focus on total quality encompasses:

+ Delivery of services that exceed clients' expectations.

+Efficiency, getting the job done right the first time and cost-effectively

+Safety, aiming to lead the industry to ensure the maximum safety and health of our people and clients.

At AL-AMTHAL, our relentless approach to service quality is not just a culture. It's based on real differentiation in our people, equipment, and processes.

OUR MANAGEMENT SYSTEM

At AL-AMTHAL we believe in a structured approach to management.

This structured approach enables us to understand and meet customer needs, comply with applicable laws and regulations, ensure consistency in our activities and, ultimately, achieve our goals as an organization.

Our management system is designed to provide a framework structure that applies across all of our business functions and operational activities.

Our management system contains the functional elements to demonstrate compliance with and be certifiable against the requirements of relevant international standards, codes and guidelines.

SYSTEMS & PROCESS – ISO

at AL-AMTHAL we demonstrate our commitment to continual improvement.

Since AL-AMTHAL first achievement ISO certification in 2019, the company has grown in size and complexity therefore AL-AMTHAL is certified against ISO 9001:2008; ISO 14001:2004 and OHSAS 18001:2007.

This is seen as a the natural progression of our development into a premium oilfield services company in line with the company ethics, values and sustainable development strategies."

Independent Oilfield Service Company in the Middle East & North Africa

OUR PEOPLE

AL-AMTHAL has assembled a team with both local expertise in our home markets and international experience at leading energy service companies worldwide. We not only start with experienced people, but also have put in place extensive training programs to ensure all services are delivered flawlessly.

The success of our work comes down to the dedication and talent of our people. To provide the work at the quality we do, we have developed a team that combines international experience, local expertise, and continuous improvement through rigorous training programs.

CODE OF CONDUCT

AL-AMTHAL business is based on fair competition. We are committed to adhere to the highest standards of integrity in all of our business practices and transactions.

AL-AMTHAL has zero-tolerance to bribery and corruption; and we live by this code.

INTERNATIONAL EXPERIENCE

AL-AMTHAL has assembled a team with international experience at the leading energy service companies. Our team, with multinational professionals, has experience in oil and gas basins worldwide and has been instrumental in applying leading-edge oil service technology and techniques to challenging oil and gas projects across the globe.

LOCAL EXPERTISE

In each home market, we seek to have a majority of our team made up of highly trained local employees. We have pioneered programs in Iraq, for example, to bring to our clients skilled engineers and technicians who are uniquely expert in the logistical, cultural, and geological conditions of our home markets.

RIGOROUS TRAINING

The oil and gas business is not static, and neither are the skills of AL-AMTHAL's team. We have implemented rigorous training programs not only to ensure consistent quality among our younger team members but also to ensure that all our team members are skilled in the latest techniques to serve our clients.

To provide services at the quality we do our team is totally committed to ensuring that all services are delivered flawlessly.

Independent Oilfield Service Company in the Middle East & North Africa

OUR EQUIPMENT

AL-AMTHAL's clients do not, and should not, compromise on the applied technologies used to meet their needs. To serve them in our home markets, we search out, procure, maintain, and adapt the best equipment from the best tool suppliers and technology companies worldwide.

To deliver the highest quality services to our home markets we bring in the best equipment with decades of proven performance in oil and gas basins throughout the world.

AL-AMTHAL has implemented a global procurement program to find equipment that leads the industry in not only technological capabilities but also reliability and efficiency, to allow us to cost-effectively deliver quality services to our clients.

AL-AMTHAL has relationships with some of the best equipment providers worldwide and is continually seeking to expand those relationships to serve our clients.

OUR PROCESSES

PROVEN PROCESSES TO ENSURE TOTAL QUALITY

At AL-AMTHAL, we know that our relentless approach to service quality does not just mean delivering one job right but consistently meeting or exceeding our clients' expectations in every job.

We are a process-driven company, seeking to continually improve our performance in all areas, including training and Service Quality, Environment, Health, Safety, and Security.

Our processes rely on proven international oilfield services standard techniques and have been refined not only for our home markets but for our culture as an entrepreneurial and lively organization.

Independent Oilfield Service Company in the Middle East & North Africa

ENVIRONMENT, HEALTH, SAFETY, AND SECURITY

AL-AMTHAL has assembled a team of Q&EHSS Professionals with both local expertise in our home markets and international experience with leading energy service companies worldwide.

We not only start with experienced people, but also have put in place extensive training programs to ensure all services are delivered flawlessly.

The success of our work comes down to the dedication and talent of our people.

To provide the work at the quality we do, we have developed a team that combines international experience, local expertise, and continuous improvement through rigorous training programs.

We believe that a sound Service Quality and EHSS system is vital to our long-term business growth and development.

We are proud to be amongst the leaders in SQ & EHSS in our markets. Examples include:

- + SQ & EHSS reporting system
- + Mandatory and rigorous continuing SQ & EHSS training
- + Driving training and driving monitoring in all AL-AMTHAL vehicles
- + Medical coverage for all employees
- + Rigorous security measures at our bases and in transit to and from job site

Independent Oilfield Service Company in the Middle East
& North Africa

DRILLING AND WORKOVER CONTRACTOR RIGS

Independent Oilfield Service Company in the Middle East & North Africa

Drilling and Workover Contracted Rigs

contract drilling services delivered using our fleet of land rigs, which are designed, engineered, manufactured according to the international standards and designs, and supported in house to meet the demands of any drilling and workover program.

we provide Drilling / Workover Rigs rental services.

EFFICIENT AND COST-EFFECTIVE LAND DRILLING OPERATIONS

With more than 50 years of international drilling experience and in excess of 10 drilling and workover rigs operating worldwide, AL-AMTHAL is well-positioned to meet your land drilling requirements. Rigs are designed, manufactured, equipped with OEM products and fully supported in house.

RELIABILITY, FLEXIBILITY, AND SUPPORT

Our global rig design, engineering, manufacturing, and support capabilities combined with the vast international expertise enable us to meet the demands of any drilling program. Every rig component must meet stringent AL-AMTHAL quality control standards, resulting in superior reliability.

AN ESTABLISHED TRACK RECORD

AL-AMTHAL has a long record of contract drilling, both independently and through JVs.

Independent Oilfield Service Company in the Middle East & North Africa

INTEGRATED DRILLING SERVICES AND PROJECT MANAGEMENT

Independent Oilfield Service Company in the Middle East
& North Africa

Integrated Drilling Services and Project Management

Services range from an integrated offering encompassing industry-leading drilling technologies, well design, drilling operations, to the entire scope of well construction, including well planning and drilling, provision of rigs and rig management, logistics, procurement, and all necessary third parties.

INTEGRATED DRILLING SERVICES

AL-AMTHAL holds the industry's most comprehensive drilling technologies portfolio, with leadership positions in all major service and product areas.

Engineering capabilities in well design and operations planning can be adapted to any project requirement.

Further support comes from AL-AMTHAL network of technical experts, able to assist in subsurface modeling, analysis, and operational support to minimize drilling risks.

- + Scope & Success Criteria
- + Project Execution Plan
- + Risk Assessment & Contingencies
- + Manage AL-AMTHAL & Third-party
- + Engineering Support
- + Interface Management
- + Technology Implementation

- + Identify the Technical Challenges
- + Roles & Responsibilities
- + Procurement & Logistics
- + Technical Solutions
- + Operations Support
- + Logistics Management
- + EHSS Management

INTEGRATED PROJECT MANAGEMENT

integrated projects bring together the entire scope of well construction and can extend to include rigs (from AL-AMTHAL or other rig contractors), logistics, and all necessary third parties.

These projects include all aspects of well engineering, design, and planning through to onsite supervision and drilling rig management.

The offering is tailored to the requirements of each project. IPM project ownership by AL-AMTHAL enables developing commercial and contractual alignment to the project objectives.

INTEGRATED WELL ABANDONMENT

Deliver integrated multidiscipline service for safe and economical well decommissioning and abandonment.

AL-AMTHAL Integrated Well Abandonment service offers an integrated approach to well abandonment from single-well to multi-well. we uses the extensive range of AL-AMTHAL technologies and integrates third-party services where appropriate.

Built on years of integrated project management experience, the IWA service encompasses a full scope of well abandonment activities, from engineering and well abandonment design to complete program execution, including removal of conductor pipe.

WELLHEAD RECOVERY

Efficiency, safety, and the environment are considered throughout the well intervention process. internationally recognized equipment used in installing backpressure valves prior to removing the wellhead, running the tubing hanger, and performing BOP tests.

Implementing the process of dismantling the well, our crew of skilled technicians help to reduce uncertainty and is mindful of the need for compliance with local regulations. Performance is based on skills learned and tested through our Competency Management System.

Independent Oilfield Service Company in the Middle East & North Africa

INTEGRATED SERVICE MANAGEMENT

Independent Oilfield Service Company in the Middle East
& North Africa

INTEGRATED SERVICE MANAGEMENT

Integrated Services Management improves the operational efficiency of projects by managing and coordinating AL-AMTHAL and third-party services and products. Enhancing operational efficiency of projects by managing and coordinating AL-AMTHAL and third-party services and products.

The primary objective is to streamline service delivery across project operations, which in turn increases efficiency, reduces NPT, and lowers costs. Based at the customer's office, the Project Integration Manager is a fully functional member of the customer's project team as the conduit for technical integration.

By providing the methodology for technology adaptation, he optimizes the execution of projects according to plan. Along with those of selected third parties, availability and capabilities are ensured for the full scope that may be required during operations. Integrated Service Management services can be as diverse as location construction, personnel mobilization, onsite survey execution, site inspections, and scheduling equipment maintenance.

Integrated Service Management services are provided on a time and materials basis and do not include well engineering (either drilling or production) and wellsite supervision, which remain the customer's responsibility.

Further support comes from our global network of petro technical experts, able to assist in subsurface modeling, analysis, and operational support to minimize drilling risks.

Independent Oilfield Service Company in the Middle East & North Africa

OILFIELD EQUIPMENT SUPPLY

Independent Oilfield Service Company in the Middle East
& North Africa

OILFIELD EQUIPMENT SUPPLY

AL-AMTHAL COMPANY is continuously active in the Middle East in the supply of oil and gas equipment, chemicals and services. Having sole supply agreements from internationally recognized manufacturers providing API certified equipment. we handle the procurement and the export of oilfield and gas equipment, spare parts and services; while our offices in Iraq are directly involved in liaising and handling the groundwork with the oil and gas companies. In addition, AL-AMTHAL cooperates with international contractors on the construction of pipelines, refineries, and other oil and gas projects.

In the past AL-AMTHAL has been awarded different contracts with the state oil companies of the Ministry of Oil in Iraq and oilfield companies and operators. These contracts covered different products and more contracts are under execution now.

AL-AMTHAL handles different products and services such as:

DRILLING AND OILFIELD EQUIPMENT:

- Oilfield Drilling Equipment & Drill bits

COMPLETION EQUIPMENT:

- Oil well Completion equipment & accessories.
- Wellhead, casing equipment and down hole tools and accessories.

PIPES AND VALVES:

- Valves (Globe, Ball, Check, Butterfly, Needle etc.) and Actuators of Different Materials.
- Seals, Ring Joint, Gaskets and Stud bolts.
- ASME, API Pipe Fittings and Flanges of different materials.
- Pipeline Rigging Products
- Casing & Tubing
- Assorted Line Pipes And Fittings

CHEMICALS AND FLUIDS:

- Oilfield Chemicals such as Demulsifier, Corrosion Inhibitors, Paraffin Control Products, Scale Inhibitors, Corrosion Inhibitors, Calcium Hypochlorite, TEG/Dehydrator etc.
- Lubricants
- Drilling Fluids
- Water Treatment Products

PRODUCTION ENHANCEMENT PRODUCTS:

- Through Tubing Perforating System
- Perforation Charges
- Bridge Plugs
- Slim Guns
- Oil Well Explosives
- Tubing Cutters

Independent Oilfield Service Company in the Middle East & North Africa

OILFIELD SERVICES

Independent Oilfield Service Company in the Middle East
& North Africa

OILFIELD SERVICES

We Provide the following Oilfield Services to our clients:

- +Slickline Services.
- +Cementing Services.
- +Coiled Tubing and Stimulation Services.
- +Mud Logging Services.
- +Wellhead Maintenance Services.

SLICKLINE SERVICES

Solving problems in all environments

Focused on maximizing operational efficiency to drive better economic returns for our customers, AL-AMTHAL Slickline Services provide safe, reliable and low cost solutions to assist in the optimization of your well production.

We believe we must be more than a Slickline services provider, we must be problem solvers. Our well-trained teams have years of experience in a wide range of applications and in the most extreme of environments. This experience coupled with new, certified lifting and pressure-controlled tools and equipment allows us the ability to provide the Right People, Process, Technology and Equipment for the job.

Our Slickline services covers both Basic services and Advanced Services

Basic Slickline Services:

- Tagging
- Setting and retrieving of sub surface safety valves
- Drifting
- Setting and retrieving of packers and plugs
- Paraffin removal
- Nipple and end tubing location
- Opening/Closing SSD
- Gas lift Services

Advanced Slickline Services:

- Broaching & Swaging
- Casing repair
- Bottom hole survey
- Fishing & Pipe Recovery

22

Independent Oilfield Service Company in the Middle East & North Africa

CEMENTING SERVICES

The cement sheath that seals your well from formation fluids is, ultimately, an investment in safety and environmental stewardship. In addition to supporting the casing, it offers a sealed barrier that protects the casing from corrosion and underground source drinking water from contamination.

Our optimized cement systems and mixing equipment enable precise, safer slurries that match well conditions while minimizing rig time.

Our cementing experts are committed to superior engineering. Leveraging advanced design technology, we apply high-quality products and additives using high-performance equipment for dependable, long-term cementing in every well, every time.

Even as our excellent service and technology extends the limits of cementing performance, one basic premise defines our success:

A good cement job starts with proper understanding of well design objectives and application of cementing

best practices, including mud conditioning, job rates, densities, centralization, and other factors that maximize mud displacement efficiencies. These are critical elements for long-term zonal isolation.

Independent Oilfield Service Company in the Middle East & North Africa

SURFACE WELL TESTING SERVICES

AL-AMTHAL GROUP offer integrated well testing services in the exploration, appraisal and development phases of oil and gas wells. Our aim is to provide newer, faster and more precise testing results through innovation and superior service quality.

SOLUTIONS

- Surface well testing onshore and offshore
- Sand management
- Burner boom stack for gas flaring
- Smokeless burner
- Multi-Phase Flow Meter (MPFM)
- Zero-flaring packages
- Early Production Facility (EPF)
- Water treatment and filtration

EQUIPMENT AND RESOURCES

- 1440 & 2160 HPHT separator units
- 10K and 15K Sand filters
- 10k Wellhead de-sander skids
- Well testing integrated trailer packages
- Smokeless burners
- Flare stacks various heights and sizes
- Offshore burner booms, 90 ft
- Downhole and surface PVT sets
- Radioactive and non-radioactive MPFMs
