ETCO for General Trading

COMPANY PROFILE

www.etco-iq.com

Introduction Letter

“ETCO is known for providing first-class quality in innovative tools and services”

Ever since we started in 2018, ETCO for General Trading set out to be one of the leading end-user service providers and to continuously offer our customers with no compromise on quality.

ETCO is known for providing first-class quality in innovative tools and services, in response to our customer's needs.

We started as a vision of superlative enterprise solutions by our esteemed team that has been growing and constantly adapting to newer technologies and industry requirements.

We are keen on maintaining our impeccably high and steadfast standards of capabilities and services

ETCO is recognized throughout the industry for constantly scaling the limits of today's technology so that our clients never have to choose between saving money and acquiring the capabilities they need to be successful.

We request your good establishment to give us a chance to prove our claim as one of the leading end-user service providers and in this way serve you better. Further we take this opportunity to assure you that all your calls and inquiries are very important to us, which will be attended with utmost care and priority.

Company Activities

We partner with industry giants to create the most efficient and cost-effective solutions optimized for their needs, and to deliver and support them all across IRAQ

We take this opportunity to introduce ourselves as leading importers, stockists & suppliers of BOSCH Power Tools, Rexroth, DWT Pipe Tools, RAD Torque Systems, Stanley and Black & Decker.

BOSCH Power Tools for Professionals

The Power Tools division of the Bosch Group is the world market leader for portable electric power tools and power tool accessories.

The professional blue power tools and accessories from Bosch are developed for professionals. Bosch creates new innovations in power tools and accessories by working intensively with professionals who use power tools as part of their everyday work.

ETCO has its own service centre to provide the genuine warranty and after sales services to our customers.

Company Activities

Rexroth: A Bosch Company

Bosch Rexroth is one of the leading specialists in the field of drive and control technologies, that develop innovative concepts for machine and plant manufacturers all over the world. With its long history and unique industry expertise, the company has become synonymous with tailored solutions. Below is a brief history of Bosch Rexroth, spanning more than 200 years.

Company Activities

RAD TORQUE Systems

New World Technologies Inc. is a leading Canadian manufacturer of pneumatic, battery powered, and electronic pistol grip torque wrenches which are marketed under the RAD trademark. RAD products have proven to be successful all over the world in such industries as oil & gas, petrochemical, mining, aerospace, power generation and manufacturing.

- New World Technologies Inc. continues to invest in and employ the latest technology to achieve the highest level of innovation, quality, and performance – which has resulted in multiple patents.
- Ensures maximum flexibility and responsiveness enabling quick deliveries and customer satisfaction by extensive in-house machining facilities.
- ISO 17025 accredited calibration laboratory ensuring maximum quality and calibration traceability.
- Designs all tools according to CSA/CE/UL Safety Standards.

As a leading Canadian manufacturer of pneumatic, battery powered and electronic pistol grip torque wrenches, our proprietary precision tools are successfully used in the oil and gas, wind energy, petrochemical, mining, aerospace and manufacturing industries around the world.

Over a decade ago, we pioneered and patented the first programmable digital torque technology enabling effortless data collection and highly precise Bluetooth calibration.

We continue to innovate and achieve the highest level of quality and performance. Our operations are designed for maximum flexibility and responsiveness, ensuring every customer receives outstanding service.

RAD Torque Systems is owned and operated by New World Technologies Inc., a company that continues to invest in and employ the latest technology to achieve the highest level of innovation, quality, and performance – which has resulted in multiple patents.

More than 25 years of gearbox design and engineering

Advanced bolting technology

Most reliable torque wrench on the market

Company Activities

To make sure that this remains so, KÄRCHER works constantly to develop new and existing cleaning solutions. Innovation is our passion, but never an end in itself. It follows from Kärcher clear conviction: innovation is what benefits people, makes your life easier, more efficient and more pleasant. All over the world. This has been the claim and the commitment since the company was founded in 1935. Our founder Alfred Kärcher aimed to always find new solutions for every challenge. To this day Kärcher have maintained this spirit of innovation. With over 1,000 employees in research and development worldwide work hard every day to develop new solutions. Because Kärcher don't leave innovation to chance. The figures speak for themselves: 632 active patents and 110 new products in 2018 alone. What's more, 90 percent of Kärcher machines sold are less than 5 years old.

KÄRCHER

Whether every day or extraordinary cleaning projects – whatever you're planning, Kärcher products and services help you do the job simply, safely and with maximum quality. Because when it comes to supporting people with their plans, the question is how can be easier for the customers to find their way forward? That's what Kärcher continue the development for and constantly improve the performance, every day. Promoting qualities through the offered quality. Because cleanliness preserves value. Since the pandemic and before, with simple hygiene measures, each individual can help to stem the spread of SARS-CoV-2. Various cleaning techniques help to remove dirt and micro-organisms that are harmful to health from floors or surfaces - whether at home, in offices, supermarkets or retirement homes. Kärcher topic special is dedicated to the most effective methods of protection against infection. Kärcher has very wide range of professional cleaning products. High pressure cleaners, vacuums, widows and surface vacuum cleaners, Disinfection systems, scrubber dryer, carpet cleaners, manual cleaning tools, powerful sweepers and vacuum sweepers, industrial vacuums, vehicles cleaning systems, steam cleaners & steam vacuum cleaners, industrial cleaning systems, cleaning agents, and more and more related accessories. In addition to the above, with Home and Garden products, Kärcher is the best choice to use in several applications and facilities such as homes, hospitals, airports, hotels, schools, and universities, Etc.

Company Activities

During the years the continuing research and development for new products and production processes has allowed Balma to launch on the national and international markets a complete and important range of heavy-duty air compressors with cast iron components, aimed mainly to the professional and industrial sectors. Thanks to its advanced technology, the high level of certified quality standards, the continuing products improvement, the large commercial distribution, the wide support and after sale centres, Balma brand is destined to further extend its image in the world. With full portfolio of Balma Air Compressors, below the main products to discover:

Do-it-yourself compressors:

Extremely easy to use and completely portable, these compressors are suitable for DIY and small workshops requiring limited volumes of compressed air to run air tools and equipment. Suitable for Hobby applications, completely portable, and small workshops.

Professional compressors:

These highly efficient, top performance compressors are ideal for professional use in laboratories of small firms and small-medium companies in general. Highly efficient, Top performance, suitable for small-medium business

Silent compressors:

The particularly compact structure and the low noise levels characterizing this kind of compressors allows to install it directly in the working area. Thanks to its features, it is possible to achieve a considerable soundproofing level, without any risk of environmental pollution. Low noise levels, easy serviceability, adaptable to industrial and professional applications.

Double stage piston compressors:

Ideal for all professional and industrial applications where a heavy-duty compressor is required with large volumes of air and high working pressures, they represent the culmination of tens of year's development in compressed air technology. Top performance, heavy-duty, and suitable for professional and industrial applications

Rotary screw compressors:

Still remember when you started up your company and bought your first piston compressor? Thanks to your hard work and the smart decisions you made, your business has grown. Now it is time to grow your equipment too. And Balma is at your side: when moving from occasional use to continuous air flow, Balma screw compressors deliver exactly what you need.

Reliable quality, easy to service, and increased productivity.

Sister Companies

We (ETCO for General Trading / Tojaan for Electronics Trading DMCC / APCO Electronics) have truly gained & maintained the confidence and trust of first-class international companies, so it is our pleasure to contact your good self for collaboration opportunities in our market.

Tojaan for Electronic Trading DMCC

Located in Dubai, Tojaan for Electronic Trading DMCC is responsible for all the international duties related to exporting, as well as being the international interface for our prouder services that we are all giving to our customers.

APCO Electronics

Located in Iraq (Baghdad / Kurdistan Region), particularly working on ELV Systems, the official partner of BOSCH Security Systems, Yamaha, Shure, Proel, Electro-Voice and Dynacord. Implemented very high-level projects such as the sound system project of Basra International Airport, the CCTV and Sound Systems of Karbala Stadium, and many other well-known projects over the country.
